IDENTIFIERS *National Archives

ABSTRACT

The 158 research papers listed in this bibliography were prepared by members of the Archivist Career Training Program from 1978-1990. Individual papers are listed alphabetically by author within the year in which they were produced. These papers provide information on various aspects of the National Archives, including presidential, federal, historical and other governmental archive collections; development policy; classification of intelligence reports and nonprint media; research trends; and ethical questions regarding archive accessibility. In addition to the name of the author and the title, each entry includes the publication date, regional division of the National Archives (if appropriate), and the number of pages. Two additional papers are listed on the inside front cover and both an author index and a subject index are included. (MAB)
